SUBJECT INDEX (Vol. 5, 1982)

Abstracts, 37, 77, 118, 157
Angiograms, retinal fluorescein, automatic development of (Siertsema, Blanksma, Biewenga), 17
Animation and graphics, for medical television, fundamentals of (Waller), 63
Art for education's sake (Clarke), 56
Audiovisual system, charge-back (Fulwiler), 135
Brain, left–right theory, and design of medical teaching materials (Gilder), 45
Breast teaching models, method for developing (Wilcox, Bartner), 58
Camera, clinician with (Goodall), 14
Charge-back audiovisual system (Fulwiler), 135
Clinician with camera (Goodall), 14
Copyright and medical photographer (Leng), 98
Developing nations, conventional and high-technology teaching methods for educating health professionals in (McArthur), 21
Digestive tract endoscopy: teaching with live television coverage (Jolly, Slatter, Waller, Williams), 4
Displaying history of medicine: Wellcome Museum in Science Museum (Bracegirdle), 124
Do-it-yourself era (Anon), 141
Dundee front projection study bootl for medical education (Biran, Harden), 9
Editorial, 3, 43, 83, 123
Education, medical, Dundee front projection study booth for (Biran, Harden), 9
Education's sake, art for (Clarke), 56
Electron microscopy, instant scanning, in teaching (Pelliniemi, Maki), 12
Endoscopy, digestive tract: teaching with live television coverage (Jolly, Slatter, Waller, Williams), 4
Equipment and Methods, 30, 110, 148
Examinations, medical, use of projected material in (Duguid, Hansell), 92
Fibrescope, photography through (Morton), 137
Film: Somebody help me! (Allen), 145
Gallery, 2, 42, 82, 122
Graphics and animation for medical television, fundamentals of (Waller), 63
Health professionals in developing nations, conventional and high-technology teaching methods for educating (McArthur), 21
History of medicine, displaying: Wellcome Museum in Science Museum (Bracegirdle), 124

Infrared photographic photometry with 'instant' film (Marshall), 69
Infrared and ultraviolet reflectances of pigmented lesions, television method for measuring (Marshall), 51
Isometric triaxial reconstruction method for quantitative study of serial histological sections (Kessler, Hutchins), 94
Kirlian photography (Ebrahim, Williams), 84
Learning at a distance (Manwaring), 61
Learning materials, 32, 75, 113, 152
Lesions, pigmented, television method for measuring infrared and ultraviolet reflectances of (Marshall), 51
Medicine, displaying history of: Wellcome Museum in Science Museum (Bracegirdle), 124
Microscopy, instant scanning electron, in teaching (Pelliniemi, Maki), 12
Models, breast teaching, method for developing (Wilcox, Bartner), 58
Patient management problems, presentation of, using random access slide projector (Harden), 72
Pharmaceutical industry approach to slide retrieval systems (Cockburn), 27
Photographer, medical, and copyright (Leng), 98
Photography through fibrescope (Morton), 137
Photography, Kirlian (Ebrahim, Williams), 84
Photography, red free, of retina (Sehmi), 142
Photography, Victorian clinical (Williams), 100
Photometry, infrared photographic, with 'instant' film (Marshall), 69
Projected material in medical examinations, use of (Duguid, Hansell), 92
Projection study booth, Dundee front, for medical education (Biran, Harden), 9
Reconstruction method, isometric triaxial, for quantitative study of serial histological sections (Kessler, Hutchins), 94
Red free photography of retina (Sehmi), 142
Reports, 35, 116, 154
Retina, red free photography of (Sehmi), 142
Retinal fluorescein angiograms, automatic development of (Siertsema, Blanksma, Biewenga), 17
Reviews, 39, 79, 119
Science Museum: displaying history of medicine in Wellcome Museum (Bracegirdle), 124
Slide projector, random access, presentation of patient management problems using (Harden), 72
Slide retrieval systems—pharmaceutical industry approach (Cockburn), 27
Slides, clinical teaching, use of microcomputer in department of medical illustration for retrieval of, (Gilson, Collins), 130
Somebody help me!—new film (Allen), 145
Teaching, instant scanning electron microscopy in (Pelliniemi, Maki), 12
Teaching materials, medical, left brain–right brain theory and design of (Gilder), 45
Teaching methods, conventional and high-technology, for educating health professionals in developing nations (McArthur), 21
Teaching models, breast, method for developing (Wilcox, Bartner), 58
Teaching slides, clinical, use of microcomputer in department of medical illustration for retrieval of (Gilson, Collins), 130
Teaching with live television coverage: digestive tract endoscopy (Jolly, Slatter, Waller, Williams), 4
Television coverage, live, teaching with: digestive tract endoscopy (Jolly, Slatter, Waller, Williams), 4
Television, medical, fundamentals of graphics and animation for (Waller), 63
Television method for measuring infrared and ultraviolet reflectances of pigmented lesions (Marshall), 51
Train or not to train? (Drury, Hurt, Young, Brooks), 104
Ultraviolet and infrared reflectances of pigmented lesions, television method for measuring (Marshall), 51
Use of microcomputer in department of medical illustration for retrieval of clinical teaching slides (Gilson, Collins), 130
Victorian clinical photography (Williams), 100
Viewpoint
Clinician with camera (Goodall), 14
Do-it-yourself era (Anon.), 141
Wellcome Museum in Science Museum: displaying history of medicine (Bracegirdle), 124
